

Job Title Sr. Interactive Designer with Flash expertise

Job Description

Our workload is expanding and we are looking for a Senior Interactive Designer who has outstanding visual design skills and a comprehensive understanding of interface, usability and information design principles. Our ideal candidate will have experience designing and creating interactive Flash movies for web delivery. Experience in online learning is a definite plus.

There are a series of 5 projects and each one will have an XHTML and Flash site associated with them to meet strict accessibility guidelines. Each project is unique, but, all share in a highly innovative and educational experience. For example, the first project will provide immersive, three dimensional experiences including visual, audio as well as Global Information System overlays as you're taking a virtual hike through time.

Responsibilities

- Design and produce concepts, mini sites, and templates with consistent quality.
- Conceive and execute functional design solutions.
- Assist in the creation and development of communication ideas.

Required Strengths

- Self motivated, organized and accountable.
- Passion for design and eagerness to collaborate with other creative people.
- Excellent communication skills.
- Ability to easily articulate creative ideas.
- Acute attention to detail.
- Comprehensive understanding of interactivity and the web.
- Knowledge of the strengths and limitations of Flash, JavaScript, Action script and XHTML/CSS, XML.
- Ability to work in an agile, highly collaborative environment with remote team members.

Functional Requirements

- Strong portfolio with 5+ years of interactive design and motion experience.
- Expertise with the latest versions of OS X, Photoshop, Illustrator, and Flash.
- Experience in Flash techniques and experience in programmatic motion with Action script.
- Ability to handle external resource integration and synchronization (audio, video and other media) in Flash.
- Expertise in Flash compression techniques and file-structuring practice.
- Experience with and exposure to design for CSS/Ajax required.

Bonus

- Google Earth API and GIS Integration would be ideal.
- Experience working with version control.

Expectations

- Work a minimum of 40 hours per week
- Available for 2-3 months with possibility for extension.
